

16
24. An edgewise orthodontic bracket as recited in Claim
13 15, wherein said auxiliary slot is positioned on a mesial side
of said bracket.

25. 17 An edgewise orthodontic bracket as recited in Claim
13 15, wherein said auxiliary slot is positioned on a distal side
of said bracket.

26. An edgewise orthodontic bracket as recited in Claim
15, wherein said auxiliary slot is positioned at substantially
the mesio-distal center of said bracket.

18 27. An edgewise orthodontic bracket as recited in Claim
13 15, wherein said auxiliary slot is positioned on a mesial side
of said bracket, said bracket further comprising a second
auxiliary slot extending entirely through said body from said
occlusal sidewall to said gingival sidewall and a second
auxiliary orthodontic treatment device having a shaft portion
positionable within said second auxiliary slot, said second
auxiliary slot and said shaft portion of said second auxiliary
orthodontic treatment device having complimentary
configurations wherein rotational movement therebetween is
restricted.

13 19 28. An orthodontic edgewise bracket as recited in Claim
13 15, wherein said orthodontic treatment device further
comprises means for receiving a generally mesio-distally
extending force applying member.
